

Fit.ly Subscriber Retention & Churn Analysis

Identifying Operational Bottlenecks & Strategic
Interventions

Executive Summary & Strategic Focus

1

Financial Pressure

High Customer Acquisition Cost (CAC) demands shift toward retention.

2

Sales Rep + CS

Support delays
\$>24\$h and Free Tier drop-off drive cancellation.

3

Ops Manager

Implement \$<8\$h support SLAs and automated re-engagement triggers.

Data Validation & Pipeline Integration

account_info

Key actions

- Standardized state codes
- Cleaned pricing artifacts
- Normalized churn status (True/False)

customer_support

Key actions

- Prefixed user IDs with 'C'
- Handled negative SLA values, classified topics.

user_activity

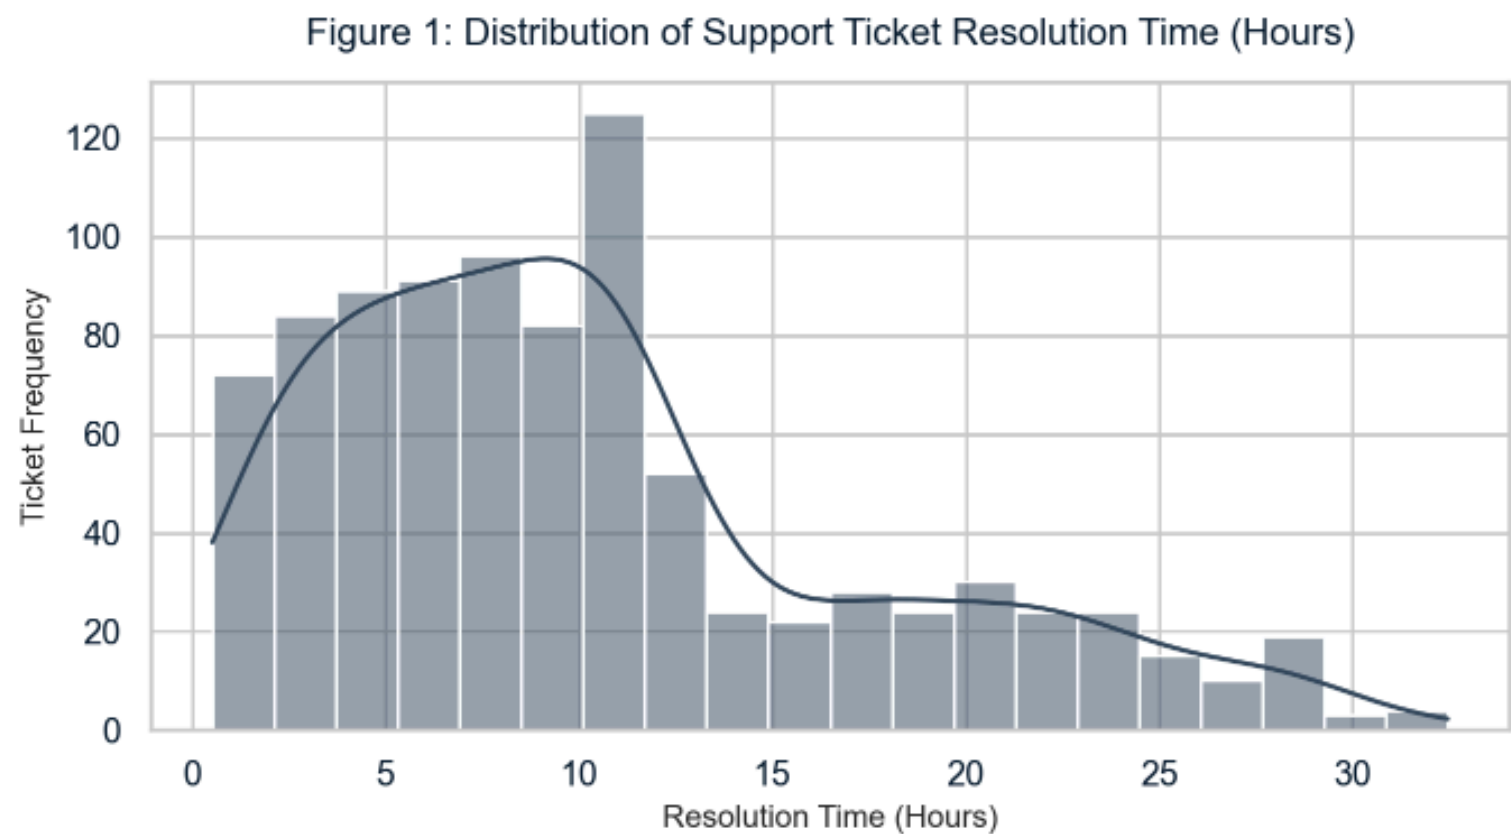

Key actions

- Standardized timestamps
- deduplicated multi-event telemetry logs.

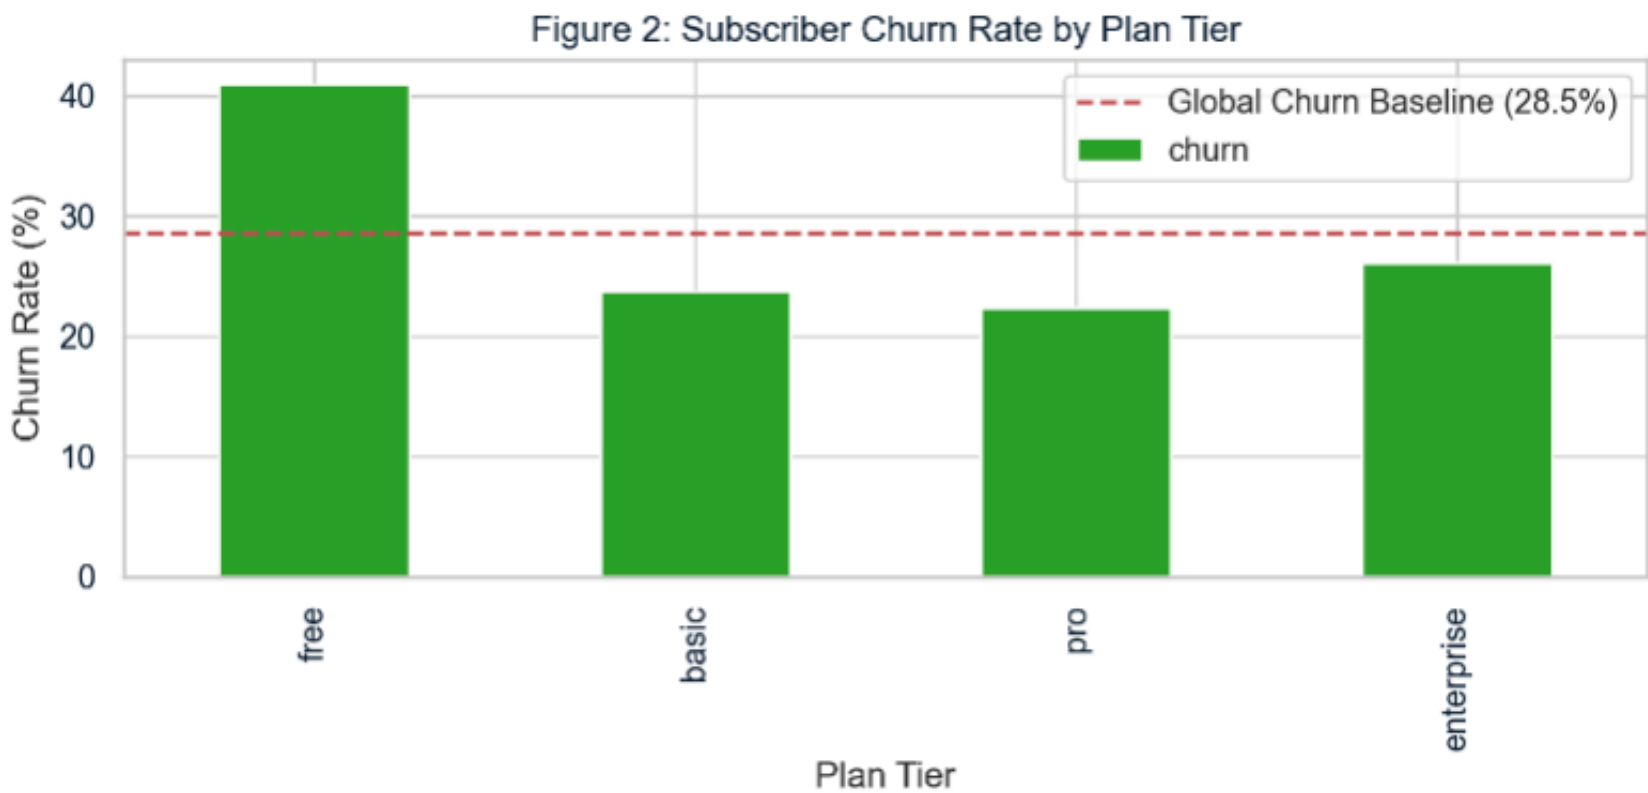

Baseline Support SLA & Tier Churn

Core Retention Metrics to Monitor

30-Day Active Churn Rate (30D-CR)

$$30D-CR (\%) = \left(\frac{\text{Subscribers Cancelling in the Last 30 Days}}{\text{Active Subscribers at Start of 30-Day Window}} \right) \times 100$$

High-Risk SLA Compliance

$$SLA \text{ Compliance } (\%) = \left(\frac{\text{Support Tickets Resolved in } < 8 \text{ Hours}}{\text{Total Support Tickets Logged}} \right) \times 100$$

Baseline Benchmark Metrics Summary

GLOBAL 30-DAY CHURN RATE

Strategic Recommendations for Fit.ly

1

Fast-Track Priority Support SLAs

Route billing and high-risk tickets to prevent 24h breaches.

2

Overhaul Free Tier Onboarding

14-day guided setup to drive early value and lower the 41.0% churn.

3

Automated Activity Triggers

Re-engage users showing 0 telemetry events over 7 consecutive days.

Implementation Roadmap & Next Steps

PHASE 1

**Support
Escalation
Rules & SLA
Alert Setup.**

PHASE 2

**Free Tier
Onboarding
Redesign & A/B Test
Launch.**

PHASE 3

**Telemetry
Inactivity Triggers
integrated with
CRM.**
